Data Management Services

Introduction

The Matheson Digital Services Group is a new multi-disciplinary team comprised of lawyers, AI software developers, legal solutions consultants and architects, legal project managers, document automation specialists and business analysts to support our lawyers in the delivery of legal services. For over 20 years Matheson has been committed to providing innovative technological solutions for our clients. Through our wealth of experience and cutting edge technologies, we can deliver bespoke solutions to a wide range of clients with data needs without the need to rely on third party service providers.

Our Expertise

The Digital Services Group uses pioneering technologies to provide the best possible solutions for our clients. In conjunction with the Matheson legal team, we advise clients in relation to data collection and review projects, including:

- Data Subject Access Requests;
- Freedom of Information Requests;
- Statutory, regulatory and corporate investigations, including dawn raids and data breaches;
- Regulatory and other requests for documents (eg non-party discovery request); and
- Litigation including early case assessment, discovery, witness statements, pre-trial preparation and electronic trial support.

Our Technology, Our Experience, Your Solution

Our highly skilled team will assess the matter, consider the most appropriate technology and provide a solution that takes into account your specific needs. We can assist you with those early key strategic decisions in relation to the review structure, content and timeline. By combining the right people, processes and technology we can design a robust and focused project review plan ultimately leading to a more efficient and cost effective project.

Matheson's integrated approach to client document review projects in both litigation and regulatory matters utilises technologies and ensures a seamless service providing streamlined policies, protocols and procedures delivering efficient processes while maintaining best practice and robust defensibility.

Digital Innovation

By combining a design thinking methodology and digital services infrastructure, our multi-disciplinary team are continuously researching and developing bespoke software solutions to integrate, enhance and optimise the document review process. Our lawyers, legal solutions consultants and software developers build custom solutions tailored specifically to meet client project requirements.
